

Purchase 1½” three ring binder with clear cover & spine viewing pockets. White recommended for ‘Diaspora’ / Black recommended for all others. ‘Slant D’ ring type highly recommended as more manageable.

Print cover and spine artwork file on standard printer paper, trim all white edges from both prints and insert prints into view pockets. Be sure to set your printer **PAGE SCALING** default to **NONE** - Any other setting may cause distortion and misalignment.

Use of a nail file recommended for insertion of spine print. Insert nail file under spine print, rough side in contact with paper (A). Apply pressure with thumb (B) while pushing with nail file (C).

‘Card stock’ (such as 67 lb. paper, for example) recommended for interior sheet covers. Print cover artwork on card stock for front interior cover (D) and place blank card stock at rear (E). Optional index divider recommended for convenient appendix referencing (F).
